Cloud & DevOps Engineer

Cloud and DevOps professional with four years of experience at Oracle Geneva, delivering secure cloud infrastructure, automation, migrations and operational support for Swiss organizations, including regulated financial institutions. Professional experience spans AWS and OCI landing zones, Terraform, Ansible, CI/CD, IAM, networking, governance, Linux operations and FinOps, complemented by hands-on Azure and Kubernetes projects. Targeting a permanent Cloud, DevOps or Platform Engineering role in Geneva and French-speaking Switzerland.

CORE EXPERTISE

Professional Cloud: AWS and OCI multi-cloud delivery; landing zones; Exadata Cloud@Customer; Autonomous Data Warehouse; Oracle Analytics Cloud

CI/CD & Delivery: GitHub Actions; Development/Staging/Production workflows; manual approval gates; validation; production readiness and handover

Security & Reliability: IAM, SSO, OCI Cloud Guard, secure networking, monitoring, troubleshooting, technical audits, patching and controlled change

Infrastructure as Code & Automation: Terraform landing zones and reusable infrastructure; Ansible VM configuration; Bash; infrastructure lifecycle management

Kubernetes & Platforms - hands-on: Docker, Kubernetes, EKS, AKS, Helm, Kustomize, services, probes, resource controls, Prometheus and Grafana

Operations & FinOps: Linux operations, migration support, cost reviews, architecture documentation, technical workshops and stakeholder support

PROFESSIONAL EXPERIENCE

04/2022 - 12/2025

Oracle, Geneva

CLOUD CONSULTANT / SENIOR CONSULTANT

Delivered cloud infrastructure, automation, migrations and operational support across the consulting lifecycle, from requirements and architecture design to implementation, technical assessment and handover. Worked with Swiss organizations including Avaloq, Rothschild, LEMO, Swissquote, Corner Bank and IEC, translating client requirements into secure, maintainable and cost-conscious cloud solutions.

02/2022 - 03/2022

ISG, Lyon

BLOCKCHAIN TEACHER - FREELANCE

Taught master's-level blockchain and cryptocurrency fundamentals, covering Bitcoin architecture, smart contracts, centralized and decentralized marketplaces, and investment risk. Translated complex technical and economic concepts for non-specialist audiences.

03/2021 - 03/2022

Epitech Digital, Lyon

EDUCATIONAL ADVISOR

Coordinated academic activities, instructors, module planning, student follow-up, project defenses and assessments. Reported progress to academic management and proposed improvements to educational processes and student support.

07/2021 - 12/2021

IglooHub, Lyon

IT PROJECT MANAGER - FREELANCE

Managed web projects end-to-end from client requirements and scope through validation and delivery. Coordinated developers, designers, content, SEO and testing contributors while maintaining quality, timelines and stakeholder communication.

03/2020 - 10/2020

EPITECH, Lyon

EDUCATIONAL ADVISOR

Supported students during their first months of C programming through structured follow-up, technical project guidance and progress monitoring. Contributed to academic coordination, project evaluation and administrative activities.

SELECTED ORACLE CLIENT ENGAGEMENTS

Avaloq | Multi-cloud landing zones and controlled CI/CD

Delivered AWS and OCI landing-zone work using Terraform, Ansible and GitHub Actions across Development, Staging and Production. Applied manual approval gates, IAM, networking, governance and OCI Cloud Guard controls to support reproducible environment delivery.

LEMO | Automated OCI Landing Zone

Contributed to a reusable Terraform landing zone covering networking, IAM and governance, establishing a structured cloud foundation for a migration context.

Rothschild | Secure and auditable OCI infrastructure

Designed OCI infrastructure for SFTP services with controlled networking, SSH key authentication, SSO, IAM, security controls and audit mechanisms, supported by architecture documentation and handover.

Swissquote and Corner Bank | Critical Exadata Cloud@Customer migrations

Contributed to Exadata Cloud@Customer migrations, migration scripting and database performance tuning while supporting operational quality and readiness for critical financial workloads.

Cross-client cloud operations | Linux, automation, FinOps and handover

Delivered Terraform and Bash automation, Linux operations, monitoring, troubleshooting, security patching, technical audits and FinOps reviews. Supported migrations, production readiness, client workshops and operational handovers.

SUPPORTING HANDS-ON PROJECTS

AWS EKS Platform Golden Path | Personal hands-on project - AWS, EKS, Terraform, Helm, GitHub Actions

Built an end-to-end platform engineering lab covering Terraform-provisioned EKS, ECR, IAM/OIDC, a FastAPI workload deployed with Helm, controlled GitHub Actions workflows, Prometheus/Grafana observability and a cost-aware deploy/destroy lifecycle.

Azure Legacy App Migration | Personal hands-on project - Azure, AKS, ACR, Terraform, Kustomize

Modernized a legacy-style FastAPI application through containerization, PostgreSQL, kind/Kustomize validation, Terraform-provisioned AKS and ACR, GitHub Actions with Azure OIDC, and Prometheus/Grafana observability.

EDUCATION

2015 - 2020 Master of Science in Computer Science

Epitech (School of Computer Science), Paris

Algorithms, data structures, distributed systems, software engineering and object-oriented programming.

2018 Master of Science in Computing

Dublin City University (DCU), Dublin

Advanced algorithms, distributed systems, databases and international software engineering projects.

CERTIFICATIONS

- OCI Multicloud Architect Certified Associate
- OCI AI Foundation Associate
- Kubernetes: Package Management with Helm
- ServiceNow IT Leadership Professional Certificate
- Oracle Database Explorer
- OCI Certified Foundations Associate
- Docker Foundations Professional Certificate
- Career Essentials in GitHub Professional Certificate
- Atlassian Agile Project Management Professional Certificate
