Swiss work permit G / Open to Swiss relocation

mobility: Geneva/Lausanne (driving licence)

CLOUD & DEVOPS ENGINEER

IT Consultant specialized in **Cloud Engineering** and **DevOps** practices, with a strong focus on **automation** and Infrastructure as Code (**IaC**) within OCI, AWS and Microsoft Azure. Strong focus on Infrastructure as Code with Terraform, automation, CI/CD, cloud governance, security and cost optimization. Currently targeting Platform Engineer, DevOps Engineer and Cloud Engineer roles in Switzerland, with a strong interest in infrastructure automation, platform reliability and scalable cloud operations.

TECHNICAL EXPERTISE

- **DevOps & Automation:** Infrastructure as Code **Terraform (OCI, AWS, AZURE)**, Containerization (Docker), **Kubernetes** (EKS, Kubectl, Helm, LoadBalancer service, Grafana, Prometheus), configuration management (**Ansible**) CI/CD pipelines (GitHub Actions), Lifecycle management, Automated cleanup (**FinOps**)
- **Cloud Infrastructure:** Oracle Cloud Infrastructure (OCI), AWS (EC2, VPC, IAM, S3), Microsoft Azure, Cloud Governance & Security.
- **Networking & Security:** VCN/VPC configuration, Security Lists, RBAC, High Availability, Disaster Recovery, Load Balancing, Identity & Access Management (IAM), FinOps (Cost optimization), Vault
- **Databases:** PostgreSQL, MySQL, MongoDB.
- **Programming:** C/C++, Bash, JavaScript, Python, HTML/CSS.
- **Leadership & Consulting:** Project management, IT governance, coordination of stakeholders.
- **Operating Systems:** Linux Administration (Ubuntu, Oracle Linux, Debian), Windows Server, MacOS

PROFESSIONAL EXPERIENCE

04/2022 - 12/2025

CLOUD CONSULTANT

Oracle, Geneva

Cloud consultant responsible for designing, deploying, and securing cloud infrastructures for Swiss clients (Rothschild, Lemo, CornerBank, Avaloq...), ensuring compliance, reliability, and performance.

- **Design and Implementation of secure SFTP solutions:** definition of cloud architectures, virtual machine provisioning, network configuration (public IPs, ports), SSH key-based authentication, Single Sign-On (SSO) integration, and audit mechanisms.
- **Implemented Infrastructure as Code (IaC)** principles using **Terraform** and **Bash** to automate OCI environments, significantly reducing deployment lead time and improving system reproducibility.
- **OCI tenancy management and governance:** cloud resource structuring, access management, improved cloud resource governance, and reporting.
- **Implementation and coordination of FinOps practices**, including consumption audits, reduced cloud expenditure, and budget optimization recommendations.
- **Contribution to migration and operation projects for critical environments**, including operational automation, technical audits, and reporting.
- **Continuous optimization of cloud operations:** proactive and reactive maintenance, quarterly security patch management, performance monitoring, and quality assurance.
- **Led client technical workshops** and provided architectural documentation, ensuring the stability of cloud environments, quarterly security patching, and risk-mitigated go-live processes.

09/2020 - 03/2022

EDUCATIONAL MANAGER & TEACHER

Epitech Digital, Lyon

Academic manager responsible for the implementation and facilitation of educational activities, in coordination with academic teams.

- Support and follow-up of computer engineering students throughout their studies, contribution to the continuous improvement of educational programs, coordination of instructors, and participation in the life and development of the school.

07/2021 - 12/2021

PROJECT MANAGER (As Freelance)

IglooHub, Lyon

Freelance project manager for a company specialized in website development, managing web projects end-to-end in coordination with clients and a multidisciplinary team (developers, designers, SEO specialists, and testers), ensuring delivery within scope, timeline, and quality expectations.

- Coordination of internal teams and client interactions, ensuring follow-up on requirements, deliverables, and validations throughout the project lifecycle.
- Supervision of web deliverable quality across design, development, testing, and deployment phases, resulting in improved client visibility, closer collaboration, and a stronger feeling of being supported throughout the development lifecycle.

EDUCATION

2015 - 2020

IT EXPERT DEGREE, MASTER LEVEL

Epitech, Paris

Description: Algorithms and data structures, web development, distributed systems, object-oriented programming.

2018

MASTER COMPUTER SCIENCE ENGINEERING

Dublin City University, Dublin

Description: Advanced algorithms, data structures, software engineering, distributed systems, databases, object-oriented programming, and academic projects in an international environment.

CERTIFICATIONS

- Oracle Database Explorer
- Oracle Cloud Infrastructure Certified Foundations Associate
- Oracle Cloud Infrastructure **AI** Foundation Associate
- Oracle Cloud Infrastructure **Multicloud** Architect Certified Associate
- **Docker** Foundations Professional Certificate
- **Kubernetes**: Package Management with Helm
- ServiceNow IT **Leadership** Professional Certificate
- Career Essentials in GitHub Professional Certificate
- Atlassian Agile Project Management Professional Certificate

LANGUAGES

- French: Native
- English: C1 (fluent)

INTERESTS

- **Bodybuilding**: Long-term commitment to discipline, performance tracking, and goal-oriented training.
- **High-Performance Automotive**: Technical optimization and engineering of high-end vehicles (BMW M-Series).
- **Tech Scouting**: Continuous learning of new technologies and trends.
